OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary Letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Fort Lewis in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Fort Lewis began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Office of Archaeology and Historic Preservation in Olympia, Washington. The records search was performed at the records center in November 1994 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT FORT LEWIS

Beginning in 1976, archaeological investigations on Fort Lewis have been conducted by or through several institutions:

Washington Archaeological Research Center at Washington State University,
Pullman
U.S. Army Corps of Engineers, Seattle District,
WAPORA Inc., Berwyn, Pennsylvania
GEO-RECON International, Seattle
Office of Public Archaeology (now defunct) at the University of Washington,
Seattle
Historical Research Associates, Seattle
Dames and Moore, San Diego, California
Larson Anthropological/Archaeological Services, Seattle, and
U.S. Army, Fort Lewis.

However, only the Office of Public Archaeology at the University of Washington has been identified as having collected artifacts.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 11 ft³ of collections have been made from Fort Lewis, all of which are presently stored on the installation. Approximately 10 ft³ were collected by the Office of Public Archaeology and include: 9 ft³ of historic glass, ceramics, metal, brick, leather, and animal bones, along with a few prehistoric stone tools, flakes, and animal bones from a 1982-83 Phase IV field survey (sites 45PI135 and 45PI120) of Ft. Lewis; and 1 ft³ of historic glass, ceramics, and metal from a 1980 survey (site 45PI100H) of forest management tracts on Fort Lewis. Additionally, there is approximately 1 ft³ of historic glass, ceramics, metal, and prehistoric stone tools and flakes from sites 45PI108, 45PI123H, 45PI107H, 45PI87, 45PI139, and 45PI85 also stored at Fort Lewis. The collector of these materials could not be determined.

All known collections from Fort Lewis are presently stored on post, courtesy of the Fort Lewis Military Museum, though they have not been accessioned there. Almost all materials

collected from the Fort Lewis post are of historic, Euroamerican manufacture, however, a few prehistoric stone tools and waste flakes are present.

The attached *Summary of Current Locations of Archaeological Collections from Fort Lewis* (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

No human skeletal remains or funerary objects were identified in a thorough review of the archaeological records, associated literature, and telephone interviews. The final examination of sacred objects or objects of cultural patrimony may be established by the associated Native American tribes (if determined to be culturally affiliated and the objects meet the definitions and restrictions specified in NAGPRA) upon further deliberation.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Three sets of references regarding archaeological work conducted on Fort Lewis are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research; Appendix V is the list of references contained in the National Archeological Data Base (NADB).

NATIVE AMERICAN TRIBES ASSOCIATED WITH FORT LEWIS

Presently, the geographic location of the Fort Lewis area is consistent with the lands judicially established as the aboriginal territory of the Nisqually Indians and the Steilacoom Indians, and is close to the lands judicially established as the aboriginal territory of the Puyallup Indians (U.S.G.S. n.d.). However, the Steilacoom Indians are not a federally recognized Indian group.

Additionally, the Fort Lewis military reservation was created in part from Nisqually tribal lands and was transferred to the U.S. Army in 1917. The tribe now asserts a claim to this portion of the Fort, as well as other lands in the Nisqually River drainage basin originally under tribal

control (U.S. Army with assistance from URS Company, 1979). Several reports examined by the MCX (Rice and Robinson, 1987; Larson and Lewarch 1992) state that the Nisqually Indians have been in the area of Fort Lewis both prehistorically and historically. In fact, the southern border of Fort Lewis is adjacent to the present-day Nisqually Indian Reservation. In addition, the Puyallup Indian Reservation, in Tacoma, is just northeast of the Fort Lewis Military Reservation.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are a draft NAGPRA Section 6 Summary letter (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes (Appendix II) which may be culturally affiliated with the collections. Of the tribes referenced above, only the Puyallup and the Nisqually are federally recognized.

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTERS FOR FORT LEWIS, WASHINGTON

[Installation Header]

Mr. Dorian Sanchez
Chairman
Nisqually Indian Community Council
4820 She-Nah-Num Dr. SE
Olympia, Washington 98513

Dear Mr. Sanchez:

I am writing to inform you of collections held by Fort Lewis that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Nisqually Indian Community. Fort Lewis has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Lewis is responsible for collections that include approximately 11 ft³ housed at Fort Lewis. These archaeological collections were produced from surveys conducted since the 1980s on Fort Lewis, and consist of prehistoric stone tools, and stone tool waste flakes, as well as historic Euroamerican ceramics, metal, glass, leather, animal bones, and brick. No human skeletal remains or funerary objects were identified in our review of the collections documentation.

We are notifying the Nisqually Indian Community because some of these materials were found in the area thought to be part of the territory occupied or used aboriginally by the Nisqually Indians. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Lewis and the Nisqually Indian Community on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

[Installation Header]

Ms. Roleen L. Hardgrove
Chairwoman
Puyallup Tribal Council
2002 East 28th St.
Tacoma, Washington 98404-4996

Dear Ms. Hardgrove:

I am writing to inform you of collections held by Fort Lewis that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Puyallup Tribe. Fort Lewis has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Lewis is responsible for collections that include approximately 11 ft³ housed at Fort Lewis. These archaeological collections were produced from surveys conducted since the 1980s on Fort Lewis, and consist of prehistoric stone tools, and stone tool waste flakes, as well as historic Euroamerican ceramics, metal, glass, leather, animal bones, and brick. No human skeletal remains or funerary objects were identified in our review of the collections documentation.

We are notifying the Puyallup Tribe because some of these materials were found near the area thought to be part of the territory occupied or used aboriginally by the Puyallup Indians. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Lewis and the Puyallup Tribe on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM FORT LEWIS, WASHINGTON

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.
EXCAVATOR/COLLECTOR:	The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

Summary of Current Location of Archaeological Collections F

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
